Aldex Mixed Bed Series

MB-1 (SC) Mixed Bed Resin

Aldex MB-1 (SC) is a **highly regenerated mixed bed of a Type 1 strong base**, **gel anion exchange resin** and a strong acid sulfonated polystyrene cation exchange resin, **designed to provide ultra-high purity water**. The special blend of Type 1 anion exchange resins with nuclear grade cation exchange resins ensure high resistance, low TOC extractables and excellent regenerable capacities for inorganic versus organic ions. Aldex MB-1 (SC) is provided in a 60:40 anion to cation ratio (by volume).

Physical Chemical Properties

Polymer Structure:

Cation Hydrogen form sulfonated

polystyrene copolymer

Anion Hydroxyl form strong base

alkyl quaternary ammonium polystyrene copolymer

Ionic Form as Shipped: Hydrogen / Hydroxide

Physical Form: Spherical beads

Uniformity Coefficient: ≤1.25 pH Range: 0 to 14

Moisture Content 60% maximum

Conversion to ionic Form:

Total Capacity:

Cation (H form) 1.8 eq/l minimum Anion (OH form) 1.0 eq/l minimum

Recommended Operating Conditions

Effluent Quality Resin should effluent

quality of approximately 18 megohm but is dependent on many

factors

Maximum Temperature:

Regenerable 60°C Non-regenerable 100°C

Slow Rinse (Displacement) Flow Rate: 2 to 10 US GPM per

cubic foot

MB-1 (SC) Features

Very Low Metal Content

Special manufacturing conditions ensure very low metal content.

Elemental analysis, dry basis

 Iron (Fe)
 <100 ppm</td>

 Copper (Cu)
 <50 ppm</td>

 Lead (Pb)
 <50 ppm</td>

Very Low TOC

Non solvent sulfonation and special manufacturing processes assure very low TOC leakage.

Uniform Particle Size

98% of all beads are in the minus 16 to plus 40 mesh range giving a lower pressure drop while maintaining the superior kinetics of standard mesh size products.

Superior Physical Stability

90% plus sphericity and high crush strengths together with a very uniform particle size provide greater resistance to bead breakage while maintaining low pressure drop.

Safety Information

A material safety data sheet is available for Aldex MB-1 (SC). Copies can be obtained from Aldex Chemical Co., LTD. Aldex MB-1 (SC) is not a hazardous product and is not WHMIS controlled.

Caution: Acidic and basic regenerant solutions are corrosive and should be handled in a manner that will prevent eye and skin contact. Before using strong oxidizing agents in contact with ion exchange resin, consult sources knowledgeable in the handling of these materials.

MB-1 (SC) Mixed Bed Resin

Pressure Drop

Fig. 1 shows the expected pressure loss per foot of bed depth as a function of flow rate at various temperatures.

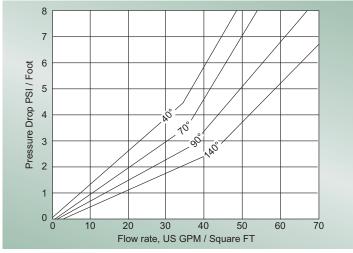

Fig. 1 Pressure Drop vs Flow Rate at various degrees Fahrenheit (F°)

Backwash Characteristics

After each cycle the resin bed should be backwashed at a rate that expands the bed 50 to 75 percent. This will remove any foreign matter and reclassify the bed. Fig. 2 shows the expansion characteristics of Aldex MB-1 (SC) in the chloride form.

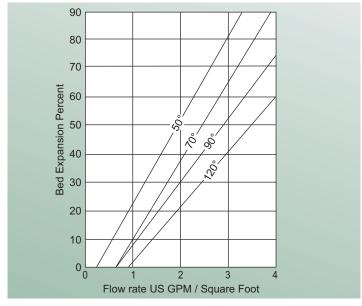

Fig. 2 Bed Expansion vs Flow Rate at various degrees Fahrenheit (F°)

Quality Assurance

Aldex MB-1 (SC) resin is tested by Aldex Chemical for resistivity, total organic carbon, and kinetic performance and will meet stringent UPW performance requirements on these most critical parameters. Aldex will fully support the quality and performance of Aldex MB-1 (SC) resin in UPW applications in order to assure full customer satisfaction with the product as delivered. Typical TOC and resistivity curves based on our quality control procedure for Aldex MB-1 (SC) resin are shown to the right (Fig. 3).
