

# TECHNICAL INFORMATION BULLETIN

PRODUCT BULLETIN

**Bulletin: 1070**

**Product Category: Filtration**

**Date: 3/5/2026**

**Subject: Dura-Series™ Transition – Effective June 1, 2026**

**Description:**

Pentair is transitioning its standard housing portfolio to Dura-Series™, our next-generation housing platform designed to improve durability, reliability, and installation consistency.

**OFFICIAL TRANSITION DATE: JUNE 1, 2026**

After this date, customers are expected to place new orders using Dura-Series™ SKUs.

What this means for you:

- Legacy standard housing SKUs will be available only while remaining inventory lasts
- No long-term availability or support is guaranteed for legacy housings once inventory is depleted
- Dura-Series™ will be the supported platform for future orders, replacements, and new installations

What stays the same:

- Existing systems in the field can continue operating as normal
- Dura-Series™ housings are designed to retrofit into existing brackets
- Pentair sales and technical teams are available to support the transition

To ensure uninterrupted supply and access to the latest product improvements, customers should plan to complete their transition to Dura-Series™ by June 1, 2026

For cross-reference assistance, please refer to the attached Cross-Reference Guide.
